Dropsafe Perimeter Safety Net

The Dropsafe Perimeter Safety Net system attaches to the perimeter structures of helidecks, preventing personnel and equipment from falling. The patented system is designed to be installed, inspected and tested by the customer, and is fully supported with free online training and technical support for **low-cost installation and ownership**.

Low-cost Ownership

- **Durable:** Up to 25-year service life
- **Quality Assurance:** Backed by 10-year warranty
- **Free Online Training:** Enables self-installation & inspection
- **Fast Installation:** Minimal helideck downtime
- **Easy Inspection:** Annual testing kit included

High Quality

- Exceeds OGUK, CAP437 & DNVGL requirements
- 3rd party tested
- SUS/AISI 316 stainless steel system designed for harsh environments
- Full traceability & component serial numbering
- Backed by USD \$10M product liability insurance

Fast Installation

- Simple order process and short lead time
- Free online training enables self-installation
- Easy to hand-carry onto helideck
- Packed & labelled for each specific area
- Minimal tools required

Easy Inspection

- CAP 437 compliant self-testing kit supplied for on-site annual inspection
- Stainless steel system enables visual inspection
- No ongoing inspection or service contracts required – no hidden costs
- Maintenance free: Highly UV, chemical & guano resistant
- Modular design allows easy replacement at sea if required

Features

-  SUS/AISI 316 stainless steel wire & components
-  Exceeds OGUK, CAP437 & all global helideck standards
-  Up to 25-year service life, backed by 10-year warranty
-  Suitable for harsh environments
-  Made-to-measure solution specifically designed for each application

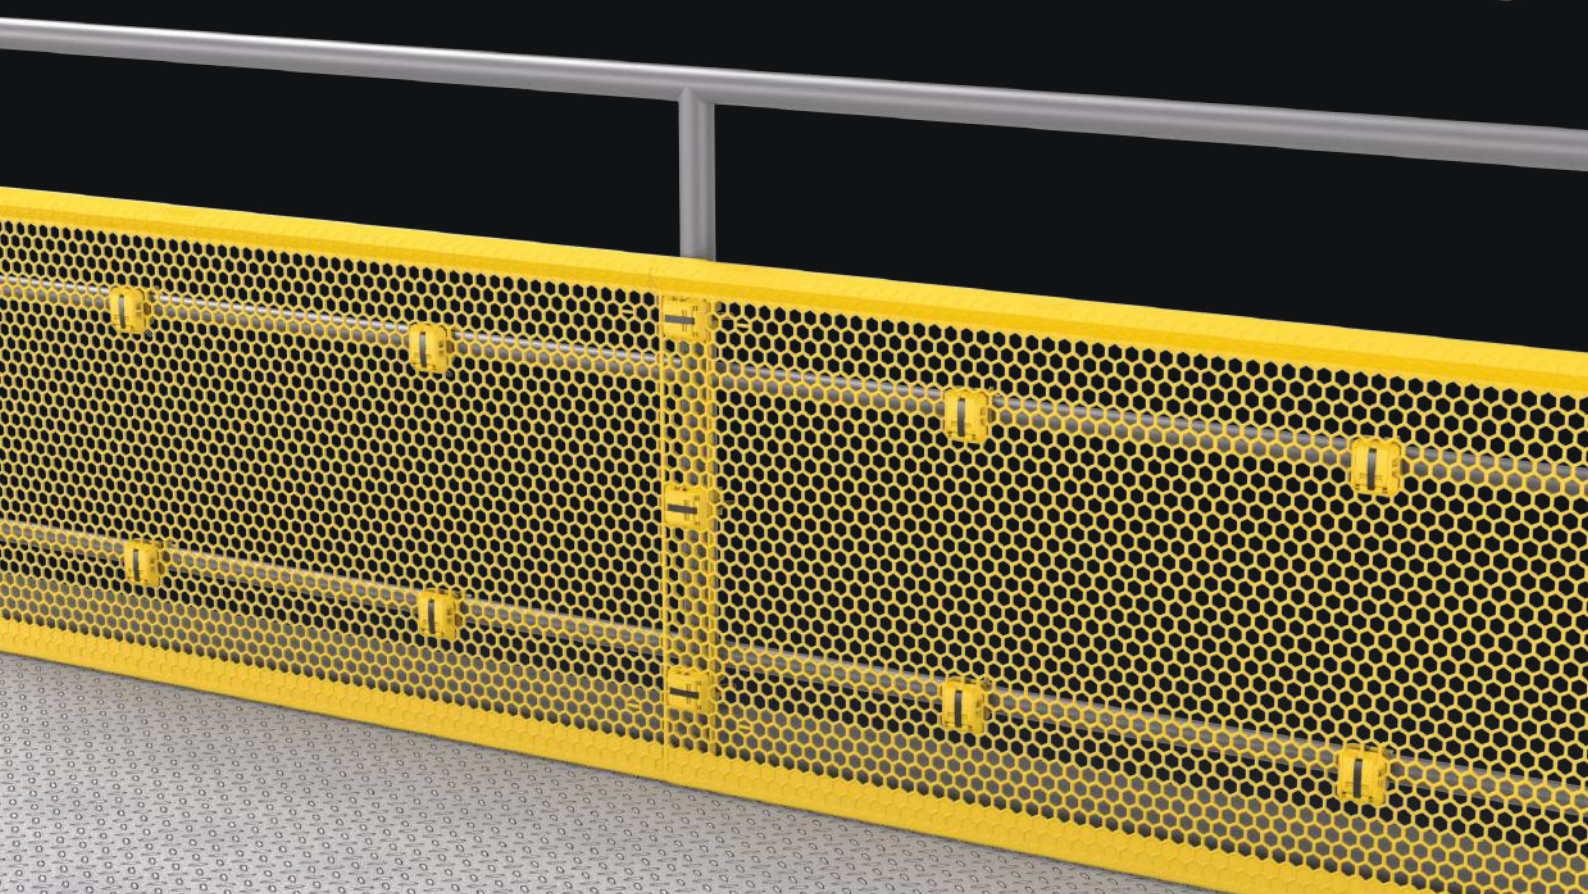

About Dropsafe

Dropsafe is the leading provider of dropped object prevention solutions for the global Oil & Gas, Mining, Marine and industrial sectors, with a range of innovative and patented products including its pioneering mesh-safety products.

Dropsafe products have become the industry standard for Drops prevention in the onshore and offshore energy sectors. The Dropsafe Barrier is a modular barrier system designed for use on a wide range of permanent and temporary structures.

The Dropsafe Nets are SUS316 stainless-steel wire nets which fully enclose and tether overhead fixtures. The Dropsafe Pouches are plastic coated SUS316 stainless steel wire net pouches that secure handheld items.
